DETAILED ACTION

Election/Restrictions

1. Claims 2-4 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over W. E. Urschel et al. in view of Mathot.

Urschel discloses (Fig. 1-15) the invention substantially as claimed including a circular rear base plate 59, one forward located annular ring 59, a first plurality of food conveying paddles 62 and an outer generally axially extending edges. Urschel's paddles are not oblique to the axis of rotation. However, Mathot teaches the use of paddles extending obliquely 67 for the purpose of clearly severing the pieces. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Urschel's paddles by extending at angle in order obtain clearly severed the pieces.

C nclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Willett, Stevens, Sr. et al., Jacko et al., Wygal et al. and Arrasmith are cited to show related device.
